Art Unit: 1793

The following is an **examiner's statement of reasons for allowance**:

The prior art does not teach the applicant's process which would appear to be an agglomerating or granulating process "without" the use of heat by mixing sludge and pumice. Note the prior art all use heating to make the granule in their process which is not done in instantly claimed invention. The product thus formed is also different as it is not heated in any manner. Note on page 2 of the specification it teaches that it is no longer necessary to heat treat the sludge so the prior art does appear to require heating not needed in the instant invention. Also, the examiner cited Kuroiwa (US 3,847,806) on his PTO 892 and he notes that this reference would appear to teach mixing sludge and volcanic ash (ie pumice) but requires an incineration or heating step versus the present or instant invention which requires no heating step.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Inquiries may be directed to Paul Marcantoni at 571-272-1373.
